How Old Lone Wolf Killed Buffalo
~~Old Lone Wolf Killing Buffalo~~

The best man I ever heard of to kill buffalo was old Chief Lone Wolf of the Kiowa - One man would sometimes kill three buffalo at a run, Lone Wolf would kill 7 or 8 or 9 or 10 - with arrows; when the buffalo did not scatter out too much, if he was in the middle of the herd, he would kill a buffalo on each side of him - that is pretty hard to do kill a buffalo on the right side - When standing on the ground Lone Wolf could kill a deer at a 100 yards - all Kiowa know how well he shot arrows, nobody equalled him - I have seen him kill an antelope with an arrow both running - at fifty yards - he was very skilful

Note! (Gabriel Renville of Dakota killed 16 buffalo in one run with a Henry Rifle) - When you chose buffalo you look at their humps - when you see a cow with a wide hump, that will be the fat one - you can see her some distance away -

Note "Wide hump" is the sign for "fat" -
