V I p 123

White Buffalo

The white buffalo is a medecine buffalo - I have seen ~~two~~ the hides of two young ones & never saw an old one - the hair is more of a yellow color, when you find them they are always surrounded by black buffalo in a big herd to hide them - they are always very fat - A man who has never struck his enemy ~~a~~ cannot kill a white buffalo - he must count a coup before he shoots - if he missies he must count another, before he shoots again - he must count a coup every time he fore he shoots just as in killing the buffalo for the Sun dance - if he cannot count these coups he must let some body else do it who can count many ~~coups~~ - The man who skins both the white buffalo and the Sundance buffalo must first tell where he scalped his enemy before he cuts the skin - the meat of the white buffalo is not eaten - it is given to the Sun, it belongs to Sun",
