GOOD ROADS EVERYWHERE

FOUR FOLD SYSTEM OF HIGHWAYS

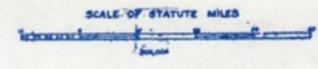

NATIONAL HIGHWAYS, STATE HIGHWAYS, COUNTY ROADS, TOWNSHIP OR TOWN ROADS

If the smallest unit within a State is the County, and there are no Townships, then the System becomes Three Fold, — National, State, County, — thus omitting the Township roads if there are none.

Population of MINNESOTA . 2,075,708, or 100% of the total;
distributed among 86 counties, or 100% of the total
Contiguous population served, 1,755,870, or 85% of the total;
located in 63 traversed counties, or 73% of the total
Adjoining population served . . . 319,838, or 15% of the total;
located in 23 adjoining counties, or 27% of the total
Total population served . . . 2,075,708, or 100% of the total;
located in 86 counties, or 100% of the total
Mileage of Public Roads in Minnesota, 79,323. Mileage of proposed National
Highways, 2,610, or 3.29% of the total
Therefore, 3.29% in National Highways will serve, in traversed and adjoining
counties, 100% of the people in the State.

These National Highways will also act as State Highways and as County Roads and Town or Township Roads for the localities through which they pass. Their building and maintenance by the National Government will thus relieve the State, the County, and the Town or Township of the cost of building and maintaining these trunk highways, and give each and every one of them one, two, three or more principal highways, as the case may be, built and maintained free of expense to the local community. The funds of the State, the County, and the Town or Township can therefore be used for their other and secondary roads less costly to build and maintain.

Similar maps of other States are being prepared by the Association, and will be issued as rapidly as possible.
