I X 13

Old "What makes the wind blow?"
"All Iowa men say there is a wind
person somewhere North, South, East, or
West, or maybe above. He has very
large ears that bend backward like
the horns of a mountain sheep, he
wags them backward & forward -
Sometimes the wind is strong sometimes
gentle according to the way he wags
his ears. I myself (I see) think he is
above."
