

THE MAN OF COMMERCE

A CHART

SHOWING
The resemblance between the arteries of commerce, as represented by railroads, and the arterial system of man; also, the resemblance between the great vital organs of man and the commercial system of the great lakes.

THE GREAT LAKES AND RIVER SYSTEM OF THE MAN OF COMMERCE.

LAND & RIVER IMPROVEMENT CO., WEST SUPERIOR, WISCONSIN.

EXPLANATORY NOTES.

The arterial system of the human body is compared to the system of railroads, and the great vital organs of the human body to the great lakes and river system of the United States. The resemblance between the two systems is striking, and the chart is intended to show the analogy between them. The human body is shown in the center, with its arms and legs extended. The arterial system is depicted in red, and the skeletal system in grey. The map of North America is overlaid on the human figure, with the railroads and river system shown in red. The text 'LAND & RIVER IMPROVEMENT CO., WEST SUPERIOR, WISCONSIN.' is printed vertically on the right side of the chart.
