

The subscribers respectfully inform Paper Manufacturers that they still continue to make

# KNIGHT'S PATENT PAPER MACHINERY

Together with all kinds of Machinery connected with Paper Making, as

**Rag Cutters, Cutting Presses, Forcing Pumps and Lifting Pumps,  
STAMPING MACHINES, CALLENDERS FOR WRITING PAPER,  
MAKING CYLINDERS, &c. &c.**

# KNIGHT'S PATENT DRYERS,

Are acknowledged by persons having them in operation, to be superior to any other kind now in use. They do not require more than one-third of the fuel required by any other Dryers, and give a surface to the paper that cannot be paralleled by any principle or plan of Dryers yet discovered. These Dryers were invented and patented several years since, and are now in operation in Pennsylvania, Maryland, Ohio, Kentucky and New Jersey.

The subscribers are also prepared to erect Paper Mills, by the day or contract, the millwright work of which will be under the superintendence of Wm. Knight, a practical millwright of thirty years' experience.—Mills located, and sites selected for persons desirous of building.

**The Subscribers have in connection with their Machine Shop, an IRON FOUNDRY, in which they are prepared to execute CASTINGS of various descriptions, with neatness and despatch.**

 All Orders promptly attended to, and all work warranted to give satisfaction.

**A. L. KNIGHT & CO.**

SHOP—Schuylkill Eighth St., opposite the Columbia Rail Road, Philadelphia.

 CAUTION.—Manufacturers are informed that all Driers made to dry and press simultaneously, are upon the principle of Knight's Patent, and all persons who make or use such, will be dealt with according to law.
